PROFESSIONAL SUMMARY

Versatile and passionate developer with hands-on experience spanning full-stack web development, workflow automation, cybersecurity, and cloud infrastructure. Skilled in building complete systems from design to deployment using modern technologies including NextJS, Express, FastAPI, Docker, and AWS. Experienced in Agile environments and collaborative team development with a strong drive for continuous learning.

WORK EXPERIENCE

N-Compass TV — Full-Stack Developer Intern

June 2025 – Present

- Designed UI/UX pages for an internal Inventory System using Figma
- Developed full-stack features with NextJS (frontend) and Express + MySQL/Prisma (backend)
- Applied corporate-level Git workflows: rebasing, merge conflicts, pull requests, code reviews
- Participated in Agile methodology with daily Scrum meetings

NextJS · Express · MySQL · Prisma · Figma · Git · Agile · RBAC · Database Design

N-Compass TV — Cybersecurity Intern

June 2025 – Present

- Performed penetration testing and vulnerability scanning on the company's official website
- Identified Broken Access Control vulnerability by intercepting API endpoints via Burp Suite
- Demonstrated Horizontal/Vertical Privilege Escalation from an unprivileged session
- Used Kali Linux tools: nmap, masscan, Burp Suite, and web crawlers

Kali Linux · nmap · masscan · Burp Suite · TCP/IP Networking · Web Scraping

N-Compass TV — Automation Engineer / n8n Developer

June 2025 – Present

- Automated attendance logging and intern allowance computation via Slack API integration
- Built AI-powered daily reports system with per-department summaries, blocker detection, and solution suggestions
- Created GitHub push announcer integrating Slack and ElevenLabs audio AI for office-wide announcements
- Developed AI tech newsletter scraper using Playwright + SerpAPI feeding into Synthesia AI video generation

n8n · Slack API · AI Integration · Python · Playwright · Google SerpAPI · Synthesia AI · ElevenLabs · Webhook · REST API

PROJECTS

Chronos — RFID Employee Attendance System

Led backend development for an enterprise HR platform with RFID time-in, leave management, and performance tracking. Architected the system and deployed across AWS EC2, Render, and HuggingFace.

FastAPI · Angular · Docker · AWS EC2 · Auth0 · Supabase · OpenSearch

Raspberry Pi Self-Healing Boot System

Engineered a failsafe for Pi 5: auto-detects drive corruption, boots from a backup flash drive, repairs the main OS, and restores the full application — surviving even a forced rm -rf.

Raspberry Pi · Linux · Bash · systemd · Embedded Systems

Personal Self-Hosted Ubuntu Server

Repurposed a spare ThinkPad as a personal Ubuntu server hosting all personal projects, an n8n instance, and web services via Nginx + Cloudflare.

Linux · Ubuntu · Nginx · Docker · Cloudflare · Tailscale

Dynamic Resume Builder

NLP-powered resume builder that curates role-specific resumes from personal data using TF-IDF scoring and dynamic HTML templates.

Node.js · JavaScript · NLP · HTML · Automation

TECHNICAL SKILLS

FRONTEND React · NextJS · Angular · HTML5 · CSS3 · JavaScript (ES6+) · TypeScript · Figma

BACKEND Node.js · Express · FastAPI · Python · PHP · Java

DATABASE MySQL · Prisma ORM · Supabase · PostgreSQL · OpenSearch

DEVOPS Docker · AWS EC2 · Nginx · Linux · Raspberry Pi · Cloudflare · SSH · Tailscale

TOOLS Git · n8n · Auth0 · Jira · Slack API · Google Cloud · Figma

PRACTICES Agile / Scrum · RBAC · Penetration Testing · Websockets · Prompt Engineering

EDUCATION

Bachelor of Science in Information Technology (Ongoing)

2022 – Present

- Capstone Project: Signifi
- Hackathon: HackEstate – Filipino Homes (with Certification)
- Hackathon: ICT Congress (with Certification)
- ElDroid Certification

Argao National High School – Senior High School

Graduated with Honors

- STEM Strand
